

SINET *presents*

The Global Cybersecurity **Innovation** Summit

The British Museum, London

26 & 27 January, 2016

The Global Cybersecurity **Innovation** Summit focuses on providing thought leadership and building international public- private partnerships that will improve the protection of our respective homeland's critical infrastructures, national security and economic interests.

Our Objective is to build and maintain international communities of interest and trust that foster vital information sharing, broad awareness and the application of our nation's most innovative technologies to enable a prosperous safer and more secure homeland for the United States, United Kingdom and our trusted allies. The US Department of Homeland Security Science & Technology Directorate supports this event along with Her Majesty's Government (HMG) as the UK representative.
