

# ZenGRC Connector for ServiceNow

## CHALLENGES OF RISK AND COMPLIANCE MANAGEMENT

Managing risk and compliance for your organization's network of applications, vendors, stakeholders, and customers has never been more demanding. Challenges include the following:

**Information silos »»** Finding, exporting, and aggregating information you need to prepare for audits and reporting is tedious. And adding new tools creates the risk that you're not getting the full picture.

**Appropriate access »»** Evidence needs context to be understood and managed. Auditors need access to specific information, but not everything. And IT teams don't have the time and budget for complicated solutions.

**Learning curve »»** Training users on yet another tool is costly and time-consuming. And requiring employees to constantly switch between apps adds complexity and aggravation.

## UNIFIED SOLUTION FOR SEAMLESS RISK AND COMPLIANCE MANAGEMENT

The ServiceNow Connector for ZenGRC lets audit and compliance teams create and manage evidence requests from within ZenGRC while allowing providers to respond to those requests from within ServiceNow.

## WHY IT MATTERS

### EFFICIENT AND HASSLE-FREE

- ServiceNow users don't need to be trained on ZenGRC. No switching between applications, necessary!
- Maintain operational reporting through ServiceNow.
- Gain the context you need for the requirements you're assessing.

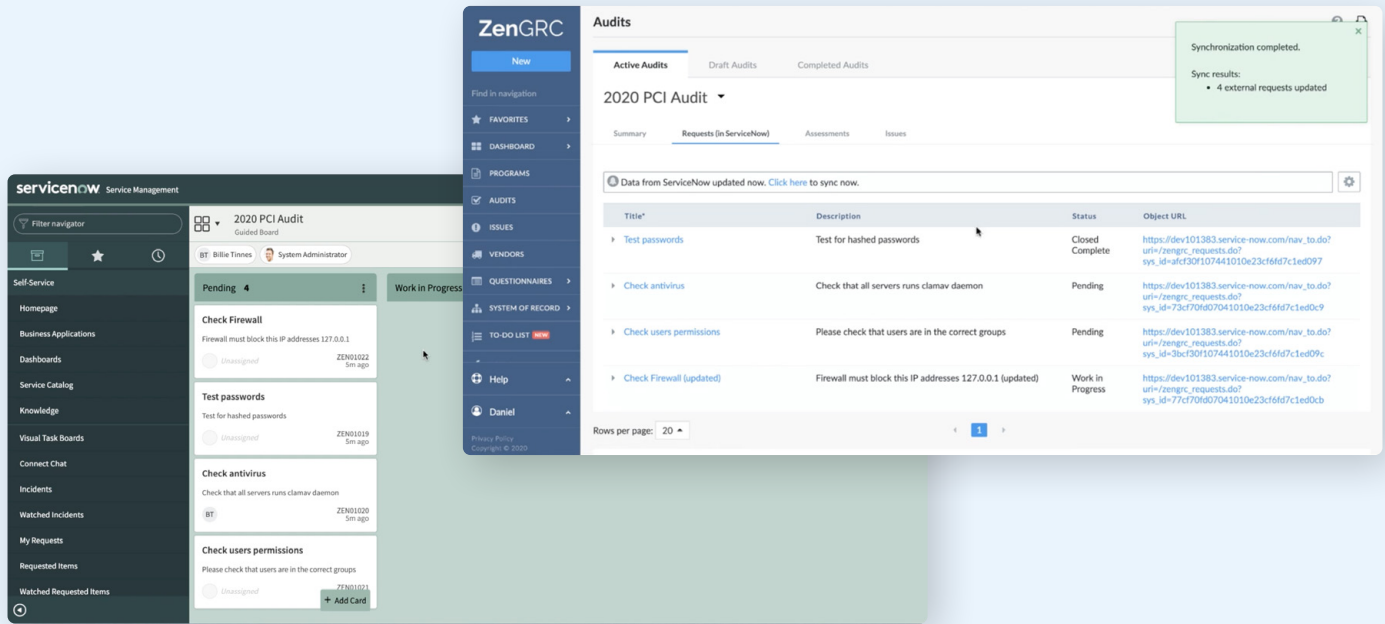

### EASY DEPLOYMENT

- ZenGRC ServiceNow Connector is ready to go from the start.
- Get up and running quickly and cost-effectively with this powerful integration.

### SEAMLESS COMMUNICATION

- Respond quickly to clarification requests.
- Effortlessly request evidence and materials as needed.
- Share appropriate content with external auditors—with no need to give access to ServiceNow.

# HOW IT WORKS

“The ZenGRC connector for ServiceNow brings the two solutions together in a way that allows us to maximize efficiency, streamline processes, and have a single source for all reporting and insights. I highly recommend ZenGRC to any ServiceNow customer looking for a risk and compliance solution.”

Steven Landman, IT GRC Analyst at Chipotle
